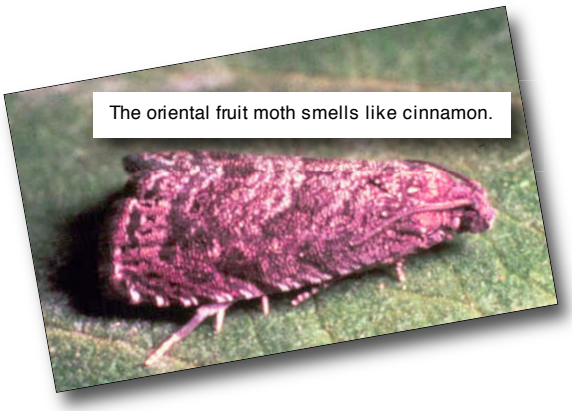
FRAGRANT BUTTERFLIES

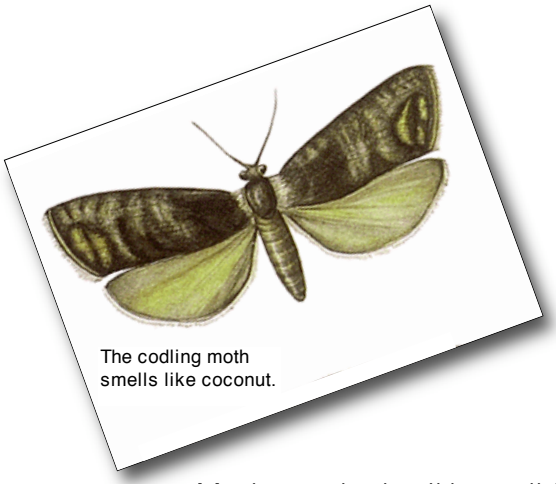
"Songs of a-scent"and worship

The male green-veined white butterfly sometimes smells of wintergreen!



Other butterflies have been described as having the fragrance of chocolate, jasmine, mango, butter, vinegar, or ammonia.

It's not commonly known, but God has added subtle perfumes to the wings of many butterflies and moths. Our Lord Jesus is so creative!



Most people don't know this because they've never tried smelling a moth or a butterfly!
