## ANIMAL EYES

Christ's strange & beautiful creations

Western tarsier

Chameleon

© Chantelle Bosch / Shutterstock

The eyes of the chameleon work independently of one another. This reptile can watch two different things at the same time.

Damselfly

Strepsiptera eyes

© Michael Hrabar

Strepsiptera are tiny wasps. The males have "raspberry-like" eyes, unique among all insects. Each sphere is an ommatidium.

Halibut eyes

Check out this web site to better understand how Jesus made different animals to see:  
<http://morgana249.blogspot.com/2014/07/10-examples-of-how-animals-see-images.html>

When a flounder is very young, it has one eye on each side of its head. As it gets older, one eye migrates to the other side.

Above is a photo of a black bear in the woods at night.  
Do you see his glowing eyes (tapetums)?

Answers to CROSSWORD found in  
**kids' kreation #82**

**Down:** 1. MILES 3. HORIZONS 4. OMNISCIENCE  
5. NITROGEN 8. COMET 11. SEE

**Across:** 2. RIGHTEOUSNESS 6. NEPTUNE 7. RUSSIA  
8. CHARON 9. MOONS 10. SEVEN 12. CLYDE

## Eye- dentification

Test your skill at identifying the different animals on the lower right. (Answers are below photos.)

## CROSSWORD

The words used in the CROSSWORD are taken from the article found in **CREATOR** Vol 20 Num 3.

### Down

1. Starfish (sea stars) and \_\_\_\_\_ have as many eyes as they have arms.
2. The \_\_\_\_\_ eyes of a dragonfly are composed of thousands of ommatidia.
4. A tuatara has a third eye on top of its \_\_\_\_\_.
5. The ommatidia of an insect's compound eyes are hexagonal; those of a lobster are \_\_\_\_\_.
8. Many animals have a reflective membrane in the back of their eyes known as the \_\_\_\_\_.

### Across

1. Entomologists have discovered that the larva of the sunburst diving beetle possesses \_\_\_\_\_ eyes.
3. The animal that probably sees the most colors is the mantis \_\_\_\_\_.
6. Eagles and vultures can see an \_\_\_\_\_ crawling on the ground from ten stories high in the sky.
7. NASA is using Christ's design of the \_\_\_\_\_ eye to better detect x-rays in space.
9. The creature with the largest eyes in creation is the colossal \_\_\_\_\_.
10. Jesus gave pit vipers the ability to see \_\_\_\_\_.
11. Bees can't \_\_\_\_\_ the color red, but can see UV light.
12. All eyes detect electromagnetic \_\_\_\_\_.
13. Goldfish can see all the colors of the rainbow, plus infrared and \_\_\_\_\_ light.
14. "The \_\_\_\_\_ of all look to You" (Psalm 145:15a).

1 chameleon 2 elephant 3 toad 4 spider 5 mantis shrimp 6 horsefly 7 parrot 8 frog 9 cat 10 snail 11 gorilla 12 cuttlefish
